Attendance: Attendance is expected. Each absence after the fifth absence will result in your final grade being lowered by one point.

Homework: Homework will be assigned in class each day and should be completed by the following class. Some assignments will be collected. Keeping up with the homework assignments is the easiest way to learn the material and pass the course!

WebWork: There will be six Webwork assignments during the term. The (approximate) due dates for these assignments are September 12th, September 15th, September 23rd, October 10th, October 28th, and November 4th.

Exams: There will be three exams during the term. They are scheduled for September 26th, October 17th, and November 7th. Make-up exams will not be allowed, except under unusual circumstances. In such cases, I should be notified about the problem BEFORE the exam.

There will be a cumulative final exam at a date and time to be determined by the registrar’s office. In accordance with math department policy, NO EARLY FINALS will be given. Keep this in mind when making travel plans for the end of the term.

You are not allowed to use calculators with graphing or symbolic capabilities on exams. You may use scientific calculators.

Learning disabilities: If you have a documented learning disability requiring any special arrangements (for example, extra time on exams), please see me by Wednesday, September 17th.

Grades: Your final grade for the course will be based on the above items, weighted as follows:

Option A: Class Participation and Preparedness - 1%, Homework and Webwork - 9%, Exams - 20% each, Final - 30%.

Option B: Class Participation and Preparedness - 1%, Homework and Webwork - 9%, Two Highest Exams - 20% each, Lowest Exam - 10%, Final - 40%

The option that results in the highest final grade for you will be used.
